STATISTICAL SOURCES: The World Factbook; the United Nations Development Programme (Mean Years of Schooling http://go.undp.org/SDC); the World Bank (GDP, life expectancy at birth, urbanization); Urban population (UN of total); United Nations, World Population Prospects, mobile cellular subscriptions (per 100 people); International Telecommunication Union and World Bank.

CONTENT NOTES: All figures except Fertility Rate are rounded to the nearest whole number. The “Average Person” described is hypothetical, and not all characteristics represent statistical averages. Ethnicity, language, and religion are based on the country’s largest group in each of these categories, which is not always a majority. Membership in the given religious group may only be nominal. The “Average Person” is not included in the number of siblings indicated. Mobile User classification is applied if a country has over 50 cellular subscribers for every 100 people. © ProQuest LLC and Brigham Young University. All rights reserved.
